

Aaryatech™ Behavioral Leakage Map

Where are we losing candidates, and what behavioral situations appear alongside it?

Demonstration dataset -- not real client historical data.

1016

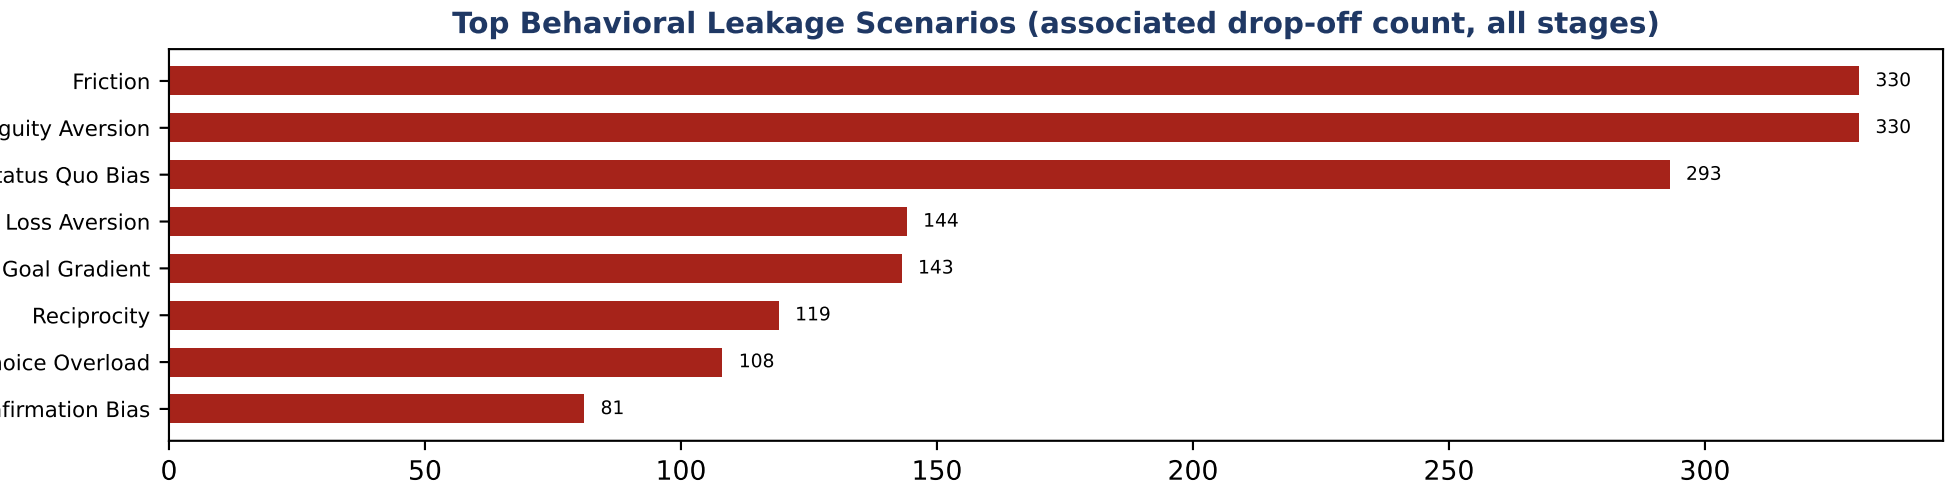

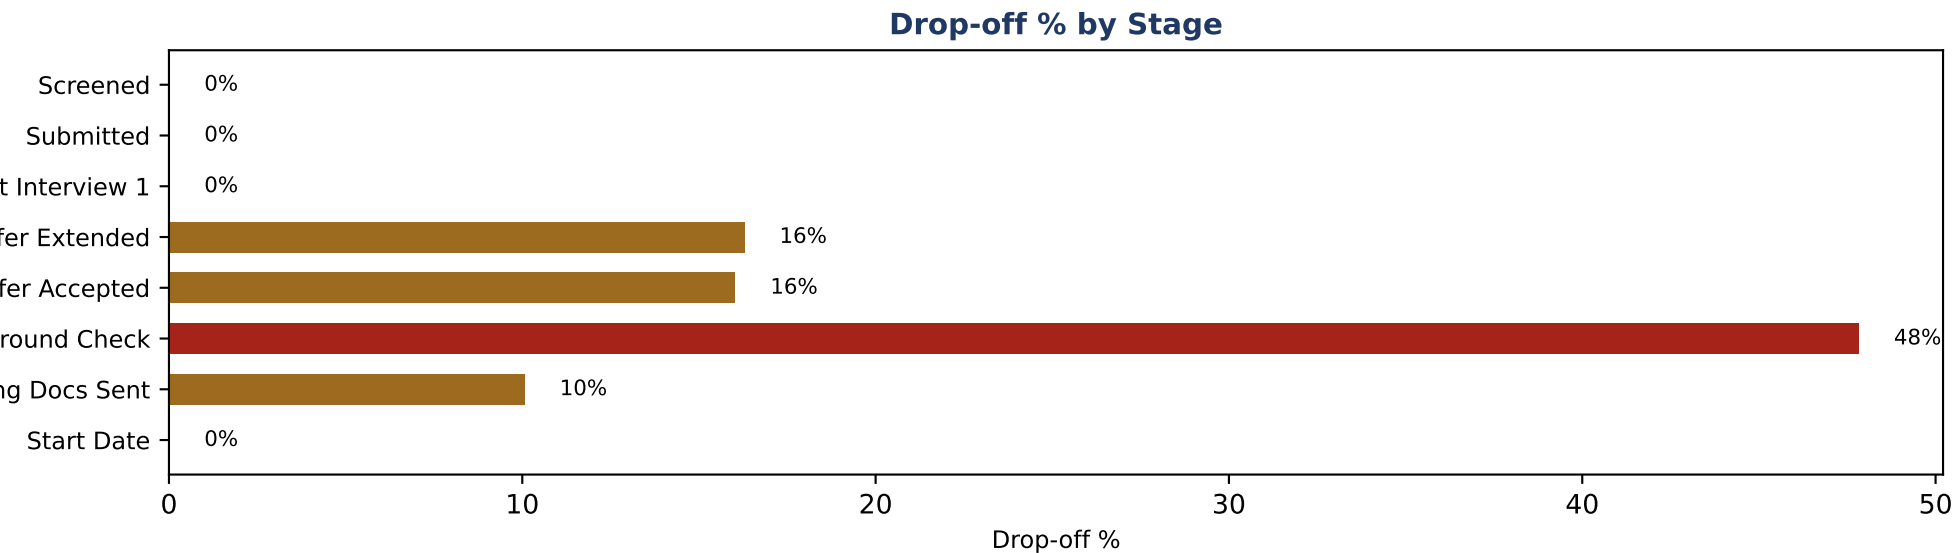

Total Drop-off (Discovery)

Background Check

Highest-Leakage Stage

48%

Peak Drop-off Rate

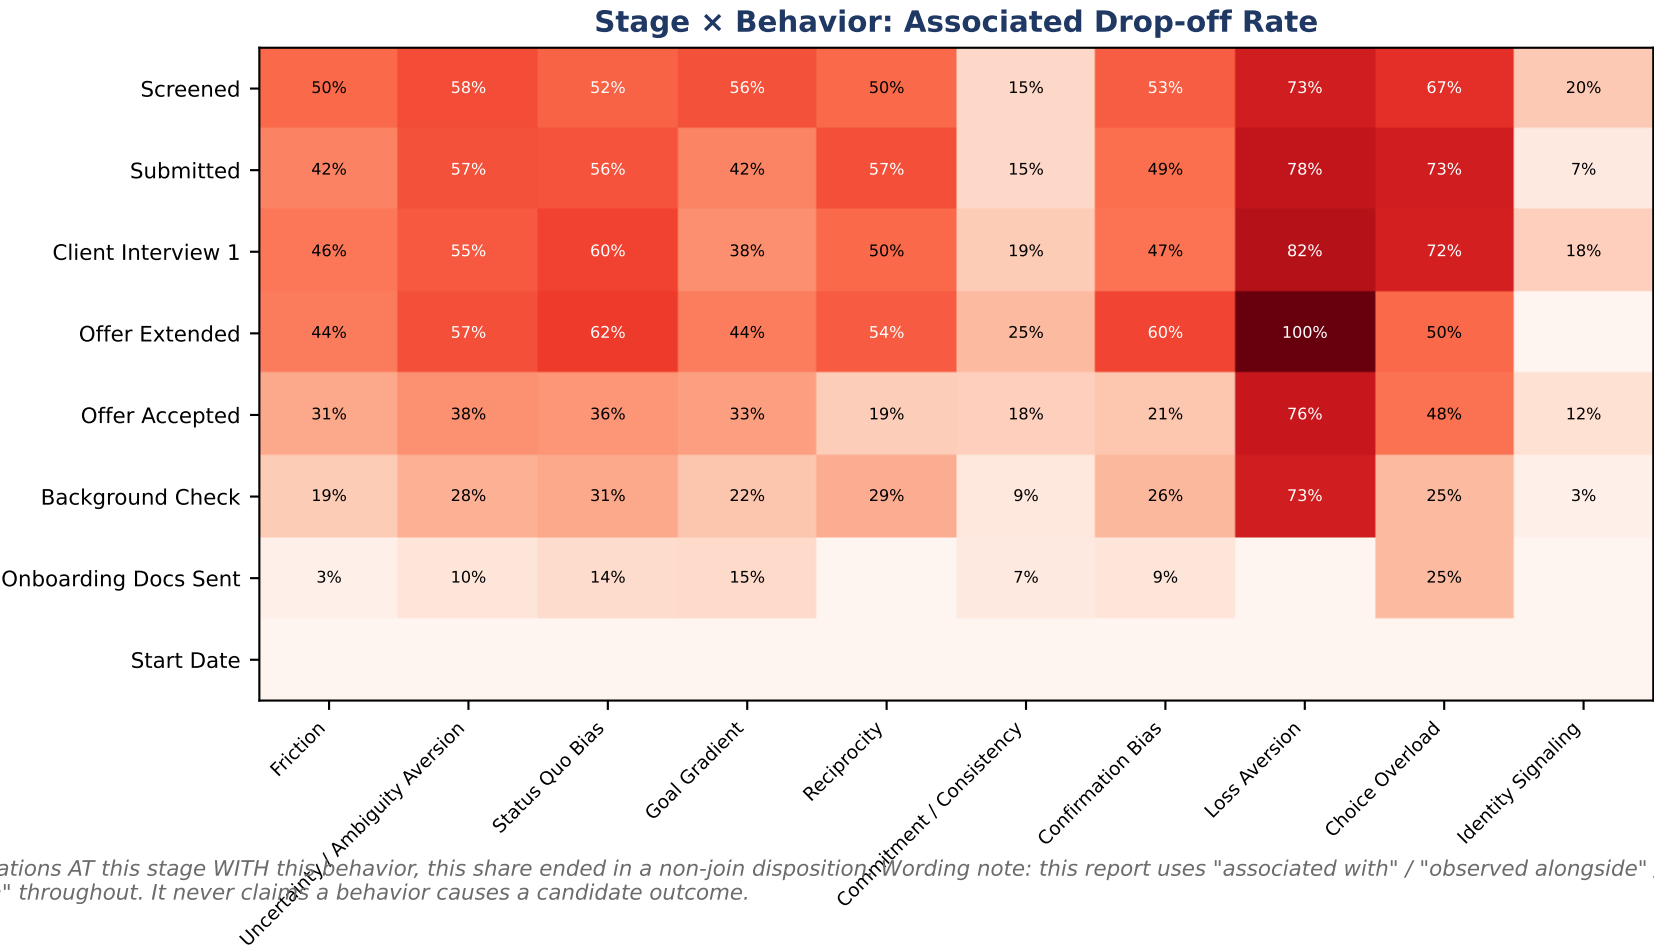

Wording note: this report uses "associated with" / "observed alongside" / "appears in applications with" throughout. It never claims a behavior causes a candidate outcome.

Behavioral Leakage Heatmap

Stage × Behavior: associated drop-off rate

Demonstration dataset -- not real client historical data.

Reads as: of applications AT this stage WITH this behavior, this share ended in a non-join disposition. Wording note: this report uses "associated with" / "observed alongside" / "appears in applications with" throughout. It never claims a behavior causes a candidate outcome.

Note: drop-off at background_check and onboarding_docs_sent partially reflects optional stage events that were not recorded for some applications that still continued, not only genuine withdrawal -- see internal QA report for detail.
