

# Aaryatech™ Behavioral Journey Map

## Report 5 of 6 -- Demonstration Run

*Aaryatech Behavioral Joining Intelligence -- ABIDS Demonstration Run*

*This analysis uses a purpose-built DEMONSTRATION DATASET created to prove the ABIDS method end to end. It is not V Dart's or any client's real historical data.*

## Business Question

At which point(s) in the candidate journey do behavioral patterns actually occur?

## What We Found

- Evidence was observed across 9 distinct journey stages, from screening through onboarding documentation.
- The stage(s) with the most concentrated evidence are: submitted, background\_check, client\_interview\_1.

## What The Evidence Supports

- Stage-level evidence frequency and which mechanisms have been formally tested at each stage are shown in the table below.

## What We Do Not Yet Know

- Whether concentration at a given stage reflects a genuine behavioral pattern or simply more communication volume at that stage in this demonstration dataset's design -- not yet disentangled.

## Why This Matters

A behavioral insight without timing is hard to act on. Knowing a pattern concentrates in the two weeks after offer acceptance (for example) tells a team exactly when to intervene, not just that a pattern exists somewhere.

## What To Investigate / Test Next

- Cross-reference high-volume stages against current recruiter touchpoint cadence -- are check-ins already happening there, or is this a gap?
- Pilot a single additional touchpoint at the highest-volume stage and measure the change.

## Evidence by Journey Stage

| Journey Stage        | Scenario Count | Mechanisms Tested Here | Intervention Point?               |
