

Aaryatech™ Intervention Intelligence Matrix

Report 6 of 6 -- Demonstration Run

Aaryatech Behavioral Joining Intelligence -- ABIDS Demonstration Run

This analysis uses a purpose-built DEMONSTRATION DATASET created to prove the ABIDS method end to end. It is not Vdart's or any client's real historical data.

Business Question

Given what we now know, what should we actually do differently -- and how would we know if it worked?

What We Found

- 11 mechanisms have enough tested statistical evidence to warrant a defined recruiter question and candidate intervention idea.
- Every entry below pairs what the evidence supports with an explicit statement of what remains unknown, so no recommendation overstates its own confidence.

What The Evidence Supports

- Suggested recruiter questions and responses are evidence-led -- built only from mechanisms with actual tested statistical support, not proposed for every observed pattern.

What We Do Not Yet Know

- No intervention listed here has actually been piloted yet -- every result field reads NOT YET TESTED. This report defines what to try, not what has already worked.
- Measurement design (how a pilot would be evaluated) has not yet been built for any of these.

Why This Matters

This is the bridge between behavioral analysis and real organizational change -- the point where the system stops describing and starts (cautiously) recommending action, always human-led.

What To Investigate / Test Next

- Pick the single highest-volume, most statistically supported mechanism and design one measurable pilot.
- Define a control/comparison group before launching any pilot, so the result can be attributed properly.

Evidence-Led Intervention Candidates

Mechanism	What We Know	Suggested Recruiter Question	Pilot Result
Choice Overload	INCONCLUSIVE evidence (chi_square_test, p=0.0472, adjusted p=0.0866); direction: lower_joining_with_mechanism.	When you notice evidence resembling 'Choice Overload' around submitted, ask an open follow-up question rather than assuming intent.	NOT YET TESTED
Status Quo Bias	WEAK evidence (chi_square_test, p=0.0198, adjusted p=0.0437); direction: lower_joining_with_mechanism.	When you notice evidence resembling 'Status Quo Bias' around submitted, ask an open follow-up question rather than assuming intent.	NOT YET TESTED
Loss Aversion	SUPPORTED evidence (chi_square_test, p=0.0000, adjusted p=0.0000); direction: lower_joining_with_mechanism.	When you notice evidence resembling 'Loss Aversion' around submitted, ask an open follow-up question rather than assuming intent.	NOT YET TESTED
Commitment / Consistency	SUPPORTED evidence (chi_square_test, p=0.0000, adjusted p=0.0000); direction: higher_joining_with_mechanism.	When you notice evidence resembling 'Commitment / Consistency' around background_check, ask an open follow-up question rather than assuming intent.	NOT YET TESTED

Mechanism	What We Know	Suggested Recruiter Question	Pilot Result
Anchoring	INCONCLUSIVE evidence (fishers_exact_test, p=0.4591, adjusted p=0.5611); direction: lower_joining_with_mechanism.	When you notice evidence resembling 'Anchoring' around client_interview_1, ask an open follow-up question rather than assuming intent.	NOT YET TESTED
Identity Signaling	SUPPORTED evidence (chi_square_test, p=0.0000, adjusted p=0.0000); direction: higher_joining_with_mechanism.	When you notice evidence resembling 'Identity Signaling' around background_check, ask an open follow-up question rather than assuming intent.	NOT YET TESTED
Reciprocity	INCONCLUSIVE evidence (chi_square_test, p=0.9006, adjusted p=0.9006); direction: higher_joining_with_mechanism.	When you notice evidence resembling 'Reciprocity' around submitted, ask an open follow-up question rather than assuming intent.	NOT YET TESTED
Friction	WEAK evidence (chi_square_test, p=0.0002, adjusted p=0.0005); direction: higher_joining_with_mechanism.	When you notice evidence resembling 'Friction' around submitted, ask an open follow-up question rather than assuming intent.	NOT YET TESTED
Goal Gradient	INCONCLUSIVE evidence (chi_square_test, p=0.2605, adjusted p=0.3582); direction: higher_joining_with_mechanism.	When you notice evidence resembling 'Goal Gradient' around background_check, ask an open follow-up question rather than assuming intent.	NOT YET TESTED
Uncertainty / Ambiguity Aversion	INCONCLUSIVE evidence (chi_square_test, p=0.2520, adjusted p=0.3582); direction: lower_joining_with_mechanism.	When you notice evidence resembling 'Uncertainty / Ambiguity Aversion' around submitted, ask an open follow-up question rather than assuming intent.	NOT YET TESTED
Confirmation Bias	INCONCLUSIVE evidence (chi_square_test, p=0.6611, adjusted p=0.7272); direction: higher_joining_with_mechanism.	When you notice evidence resembling 'Confirmation Bias' around submitted, ask an open follow-up question rather than assuming intent.	NOT YET TESTED
